Parental Controls

Parental Controls allow you to keep your kids from seeing programs you don’t want them to watch. You can block specific channels, titles or shows according to their ratings. You can also hide adult titles so they won’t appear in the on-screen program guide. Another feature is the ability to prevent your children from purchasing On Demand programs or Pay-Per-View Events without your consent. After setting a personalized four-digit code, you can set Parental Controls either from the on-screen program guide or while you are watching television. For more information visit our website at comcast.com/parentalcontrols or call 1-866-781-1888.

1. From the Parental Controls Menu, select Hide Titles.

IMPORTANT RECEPTION INFORMATION
The cable we have installed in your home is approved by the Federal Communications Commission (FCC), and is safe and reliable for carrying cable TV signals. Here are a few tips to keep it that way:
1. During severe electrical storms, you should unplug your TV set and cable box to avoid damage. Comcast and the set manufacturer are not responsible for damage that occurs due to acts of nature.
2. Your cable box operates on 110 volts, so take all the precautions you would for any small appliance — such as checking to see that the cord is not worn or damaged.
3. For your own safety, do not attempt to open or otherwise tamper with your cable box.
4. If you have someone other than Comcast install the inside wiring in your home, or if you do it yourself, ensure that it complies with applicable governmental regulations (such as the FCC signal-leakage rules) and does not interfere with the normal operations of the cable system and other communications systems (such as radio used by the police and fire departments) and devices.
5. If your TV has no picture or sound, make sure it is plugged into a live electrical outlet and not controlled by a wall switch.

Wiring Diagrams
We have provided diagrams of three common wiring configuration options for hooking up your TV, set-top cable box and other A/V equipment such as a VCR, DVD player or stereo receiver. If there is not a diagram that resembles your equipment check your owner’s manuals or go to comcast.com and search: Wiring Diagrams. If you have questions or need additional technical support please call 1-800-COMCAST.

Option 1 — Cable Box and DVD/VCR
Allows viewing of cable channels using the cable box as your tuner. You can record any channel as long as you are viewing that same channel.
Option 2 — Cable Box Only
Connect cable from the wall to the Cable In post on the back of the cable box. Locate the To TV/VCR connection on the back of the cable box and connect the cable wire. Attach the other end to the Cable In post on the back of your TV.

Option 3 — HDTV with Cable Box and Home Theater Receiver
Allows full advantage of the Comcast cable box digital audio features with a stereo or home theater receiver.

For additional installation information, such as how to install DVR, please go to comcast.com.
What should I do if I plan to move?
Before you move, please call 1-800-COMCAST. This is the best way for us to disconnect your service, retrieve your cable box and arrange for cable television service in your new home. Call us in advance and we will schedule a new installation, provided that your new home is in our service area. All equipment provided by us should be returned to us immediately should you decide to disconnect your cable service.

Why won’t my remote control respond when I press a key?
Press the Cable button on your remote and then try to change channels. If nothing happens, check the batteries for possible replacement. If the remote still doesn’t work, press the ▲ button on the front of the cable box. If the channel changes, then most likely you have a faulty remote that may need to be replaced.

How easy is it to hook up my stereo to my Comcast Digital Cable?
Very easy. In fact, we’ll be glad to do it for you. Once your Comcast Digital Cable is hooked up to your stereo, you will really begin to enjoy the full range of your home entertainment experience. Not only can you listen to music channels without having your television on, but watching movies can be like having a theater in your home!

How do I control what my child watches?
With the Parental Control feature of Comcast Digital Cable, you can restrict the viewing of certain material on your TV. You can set a lock to restrict viewing by rating, such as R or NC-17, or restrict viewing by program title. You can also completely lock out certain channels. For more information, refer to the Parental Controls section found in this guide, visit our website at comcast.com/parentalcontrols or call 1-866-781-1888.

What if I forget my Parental Control codes?
Call Comcast customer service to reset them. After they’re reset, you’ll be able to enter your new parental control code.

If the power goes out, do I need to reset my Parental Control codes, Favorite Channels and Reminders?
No. These are maintained in the Comcast digital cable box memory.
